Organization of an "ALARA Benchmarking" at Ringhals and Forsmark nuclear power plants

In March 2014, Ringhals and Forsmark NPPs hosted a special benchmarking visit; the aim was to review the organization of the occupational radiation protection and particularly the ALARA process. The "ALARA benchmarking team", gathering representatives from the utility – Vattenfall, CEPN and Radiation Protection Managers from several plants, identified numerous good practices and also suggested areas of improvement.

More about this first-of-its-kind benchmarking in the EAN ALARA Newsletter.
